AT&L AV SOA Governance

Core Business Management Group

- ▶ CBMG supports WSLM in its three primary functions:
 - Decisions on data definitions, authoritative sources, and standards
 - Decisions on data policies (e.g., access, frequency, etc.)
 - Establishes AV SOA team implementation priorities
- ▶ CBMG composed of Service & OSD stakeholders
 - They represent the equities of their organizations
 - CBMG reconciles issues if possible prior to WSLM consideration
 - Refines remaining issues for focused WSLM discussion
- ▶ Remainder of discussion:
 - An issue example from last CBMG/WSLM forums
 - Service Representatives will discuss their governance perspectives

Example: Data Update Frequency Issue

Immediate AV SOA Issues: #1. Data Update Frequency
